

Data Collection Topic Understanding Check

The Problem

You need to collect data about climate change in your town from 2010 to 2015. Describe the data you'd collect to support that climate change analysis.

(After answering, look at the discussion on the following page)

Discussion

You should collect at least two pieces of climate change data for this, though the more data you collect the deeper your understanding could be

Example data includes: temperature, wind speed, rain fall, and humidity
