Using tee (Lab)

Exercise

The **tee** utility is very useful for saving a copy of your output while you are watching it being generated.

Execute a command such as doing a directory listing of the **/etc** directory:

```
1   $ ls -l /etc
```

while both saving the output in a file and displaying it at your terminal.

Solution

You can see a solution for this exercise here:

```
1   $ ls -l /etc | tee /tmp/ls-output
2   $ less /tmp/ls-output
```

Mark as completed
